Glenn Enters 2d Orbit of Earth

Pre-Town Meeting Hears Debate On Woods Hole Traffic Problem

EAST FALMOUTH, Feb. 20 — [illegible] said that an article asking that the setting up of East Falmouth and Woods Hole districts be dismissed from the warrant for the town meeting session questioned by Mrs. Lawrence Hall at a public hearing held in the East Falmouth Elementary School last night.

Some 100 persons for more than one hour heard suggestions about the article, which was inserted in the warrant by petition. A debate between Mrs. Hall and Harold Lees as counsel of the Woods Hole Village Improvement and Nantucket Steamship Authority and Mrs. Hall and Mrs. Lawrence Hall, property owners, followed.

Attorney George H. Lethbery Jr., counsel for the Woods Hole group, said he spoke for town meeting action on setting up a district in the article on setting up a district in Woods Hole and on hiring a traffic officer to direct traffic in Lawrence's Woods Hole property, as well as the pavilion.

"This is a Woods Hole problem," he said, "and it is not a problem for the whole town. It is a Woods Hole solution," he said, in referring to the article. "We are not asking for a solution for the whole town," he said. "We live on the Cape and we expect others to help us to solve the authority."

Mrs. Lawrence Hall was applauded by Miss Mary Sears, who said $1,500 to conduct a survey to determine the feasibility of re-locating the steamship authority between the Steamship Authority and the residents of Woods Hole "has been in town to me a little more patience.

'We Live Here'

"We live there. If we are willing to wait for a better solution, who else shouldn't you." The Woods Hole Village Improvement Association's parking and traffic committee chairman referred to some of Attorney Lethbery's arguments as "flimsy."

Dr. Senft said the authority "is not here for Falmouth, it's here for the Islands."

Mr. Kelen asked for permission to speak and said he regretted that the petitioning of Woods Hole should be brought before Falmouth. "I strongly question the doctor's views. There are many, many people in Woods Hole who want the authority," he declared.

He said he was "surprised" to learn that "50 percent of the voters and taxpayers object to the authority." They're not all of the Woods Hole articles be dismissed from the warrant.

Where Park Cars

Mr. Kelen said that the association's committee proposes the following:

Precinct 3 Unit To Air Warrant

FALMOUTH, Feb. 20 — Several in the series of regular precinct town meeting precinct sessions will be held by Precinct 3 Association this evening at 8 tonight in the Falmouth Inn.

Main item on the agenda will be a discussion of articles in the town meeting warrant.

Precinct 3 Association was reported that "97 percent of the voters and taxpayers object to the authority" as they're not all of the Woods Hole articles be dismissed from the warrant.

Speaking of an article he submitted asking for a study of the

Contrail of John Glenn's Atlas-Mercury rocket streaks a beautiful white trail across the American Flag flying from a tracking station at Cape Canaveral, Fla. "I feel fine. Oh, what a view," were the words of Glenn seen after his Mercury capsule separated from its Atlas booster.

Uses Manual Controls In Capsule

'Little Warm' In Space Ship, Astronaut Says

By United Press International

CAPE CANAVERAL, Fla., Feb. 20 — Marine Lieutenant-Colonel John H. Glenn went into his second orbit around the earth shortly before noon today.

His space ship swung over Bermuda and Africa for the second time as he remained in constant voice contact with at least one of the tracking stations set up to follow his historic flight.

Project Mercury officials said the Glenn capsule "is on the exact course" of Africa for the second time, a report that the attitude control system "apparently is not working" and other systems are all right."

Manual Control

They said he was maintaining manual control.

Glenn also said that his "status was excellent," mercury control at Cape Canaveral reported.

A spokesman said Glenn "apparently is getting quite a bit of sunshine through the window" as the capsule and that he reported he said and he was "a little warm."

The capsule is in good shape. All systems are go."

"The view is tremendous . . . it's beautiful."

That is a sample of his happy remarks as the first artist to be flashed through the stresses of acceleration, weightlessness and reentry weight from 100 to about 1,200 pounds, and then back to weightlessness and finally to earth, all into a state of complete weight lessness.

Risen to Flame

A 10-foot Atlas rocket, generating 360,000 pounds of thrust hurled Glenn and his Friendship 7 space capsule into the sky at 9 a.m.

It rose slowly in orange flame, then seemed to hang for a time as the astronaut into orbit at 17,560 miles an hour. He followed the long line track broken by Russia's Yuri Gagarin, who flew around the earth once last April 12 and Gherman Titov, who made 17 orbital laps Aug. 6-7.

The Atlas shot Glenn into an orbital path which ranged in altitude from 100 to 162 miles. It seemed a big hurtling always centered, even as the capsule flew high above the Indian Ocean, Australia, the Pacific and finally the U. S. A.

Almost Perfect

Glenn's voice broadcasts were relayed around the world by the Mercury communications network. Delighted space agency officials said the launching was almost perfect, except for the failure of the space suiter's orbital path as "almost perfect."

Over Kano, Nigeria, Glenn exclaimed: "Oh, that's beautiful. Because everything is a space. Glenn reported two yellow lights on his control panel and two more gone.

Re Concussion

At 10:40 a.m., Glenn radioed to Muchea, Australia, that "I am feeling real good. I'm in real fine shape. I'm having no problems."

The astronaut's physician, Lieutenant Commander Lewis G. Cooper, who was at Muchea, Glenn reported that "concussion seems to be okay."

Hyannis Was a Ghost Village for 47 Minutes

HYANNIS, Feb. 20 — Everything was "A-OK" in the Hyannis business district at 9:47 a.m. today but it certainly was for four "business as usual." The reason? An astronaut was making history-making flight around the earth. Business all that time of day a number of early shoppers would be moving from store to store but at that time today Main Street was void of the appearance of an old Western ghost town.

From Barnstable Road to High School Road all that could be seen were two police patrolmen on duty, one checking meters and the other on a "beat patrol." Not a vehicle was moving on the road or sidewalk.

A dozen steps off the street and the "business as usual look" was evident.

Watch Flight

In the establishments that sell television sets, or those where a portable receiver could be installed, all eyes were on the TV screens with clerks and "customers" alike focusing eyes and ears on the likeness of Jim Hickman, rocket expecting on the screen, and the hundreds of second accounts of a deathly silence settled among the hundreds attended the television sets. In one establishment where this reporter was fortunate enough to view the historical "lift off" all eyes were glued and turned in.

The count and then minus 3, 2, 1 etc. the huge Atlas rocket spouted billows of flame and smoke and then slowly but surely from the launch pad.

The 36 or more in the viewing area of the TV sets caught a sigh of apparent relief as the rocket rose from the launch pad. The long lens TV cameras followed the rocket's precisely-timed flight and when the first head of a pin on the 36-inch TV screen disappeared it was the rocket in view.

When the announcement minutes after takeoff that Marine Lt. Col. John Glenn was reporting all systems operating normally, the sighs of relief and reporting the Friendship 7 in orbit, hundreds began to leave the viewing area.

'He'll Make It'

"From now on its in the hands of God," one weathered fisherman said after left her post. Another remarked: "I think he'll make it, I'll make it okay now, the takeoff was the most dangerous."

"Blastoff at 9:47 a.m. was the signal for visits away from Cape Cod, but with the announcement that Glenn was in orbit and headed confidently and if straight

Glenn would "this hoard by appearing food from a plastic container.

For his three 90-minute orbits around the earth in his space capsule, Glenn carried two tubes of food, one of applesauce and the other pureed meats.

Re Concussion

At 10:40 a.m., Glenn radioed to Muchea, Australia, that "I am feeling real good. I'm in real fine shape. I'm having no problems."

The astronaut's physician, Lieutenant Commander Lewis G. Cooper, who was at Muchea, Glenn reported that "concussion seems to be okay."

Censure Bid Gets Backing

House to Debate Chadwick Action

By United Press International

BOSTON Feb. 20—The Rules Committee of the Massachusetts House today voted 13-4, along party lines, to censure Representative Harriman Chadwick (R-Winchester), who linked some of his colleagues with bookies.

House Speaker Thompson (D-Lawrence), chairman of the Rules Committee, announced the committee after a 45-minute closed door meeting. He said the committee's report will be presented to the full House later today for an open debate.

All 10 Democrats voted in favor of the censure motion, which was made by House majority leader Francis J. Kerrigan (D-Lawrence).

The censure recommendation resulted from Chadwick's public charges last week that the Rules Committee Jan. 16. He was summoned to explain charges he made on the nationwide television show, Biography of a Rookie Legislator. Thompson said the censure motion was recommended because that the committee found Chadwick did not back up his charges that some legislators were actively involved in the numbers racket. Chadwick was absent at the hearing that the committee summoned to input a presentation of bookies by investigators.

Housing Unit To Request Continuation

BOURNE, Feb. 20—Bourne Housing Authority committee appointed to study the feasibility of housing for elderly persons met with continuation of authority at March 5 town meeting. It will be presented today by Selectmen Augustus F. Wagner, chairman of the committee.

The committee, including Lawrence Fitzgerald, Mrs. Ruth Ellis and Mr. Wagner, was appointed by former town moderator Harold MacDonald to conduct a survey of housing conditions and persons interested in such a project.

A preliminary report was given Mr. Wagner said, indicated that there is a definite need for housing for elderly persons in Bourne, but he said that according to the Federal Housing Administration, a minimum of 80 would be needed before a project could be considered. Mr. Wagner said a further survey would be made to find out if such a committee continues in function.

Film Showing To Aid Fund

WOODS HOLE, Feb. 20—Children's movies will be shown in the Woods Hole Community Hall by Marine Biological Laboratory students for the benefit of the Woods Hole Child Health Association.

The film program will include "The White Mouse," a story of a white mouse who runs away from a circus and meets many interesting characters, a film about "Lassie's Harlequin" and a film about a mischievous squirrel.

No admission will be charged but donations may be made at the center's fund.

Astronomy Club Meets Tomorrow

NORTH CHATHAM, Feb. 20 — Cape Cod Astronomy Club will meet at 8 tomorrow night at the home of Earle Hancock.

Plans will be discussed for the organization to date have been completed and a constitution will be drawn up.

Tuesday night for perspective members to meet with the club for the last meeting and membership will be completed. Mrs. Hancock and Mr. Perrotta will be the speakers at tomorrow's session and will discuss various types of optical equipment. Refreshments will be served by the executive committee.

Falmouth Counsel Asks Town Liability Insurance

FALMOUTH, Feb. 20 — Asbestos-plagued defective condition of the town of liability insurance by the town counsel, Attorney Edward C. Stevens, at a meeting of the board of selectmen in West Falmouth, on July 3 last year.

Falmouth now pays about $65,000 a year in premiums for insurance coverage, on policies that cover watchmen's compensation, fire and theft, automobile liability and property damage to the town employees, and the town's contractual liability. The town has been sued for personal and property damages in the past, and has been forced to carry insurance as protection against future suits.

In other matters, Town Counsel Stevens reported that he was preparing suits to be brought by the town against persons who have violated the town's zoning by-laws by the erection of buildings in the wrong areas, and construction of buildings without the proper permits. He said that a number of suits have been ended in the town's favor by the decision that the zoning was upheld by the State Supreme Judicial Court.

Attorney Stevens cited a case pending in U. S. District Court, where the town is being sued by a property owner who is seeking $100,000 because of alleged injuries sustained when he fell on the sidewalk in front of the Falmouth Theatre in June 1960. The property owner claims that the sidewalk was brought to Main and Depot Streets against the selectmen's wishes. The case is scheduled to be heard by the Federal Court in Boston on March 5.

Attorney Stevens also reported that a case involving the boundary of $125,000 has been appealed to the Supreme Court.

Rotary Club Gives Citation

Woman Honored By Bourne Unit

BUZZARDS BAY, Feb. 20 — Mrs. Arthur D. Keene of the Bourne Unit has been awarded a citation for public service by the Bourne Rotary Club, it was announced at the meeting last night at Bourne Methodist Church.

The citation was awarded by the unit of all club members by Fred Hamilton, president. Mrs. Keene was Barbara Newell Snow of Buzzards Bay. She graduated from Bourne High School which she organized and directed the band for several years. Mr. Snow called this the first time a woman was honored by the club.

By giving freely of her time for the last longer period than is had expected when she asked to help out in the beginning, Mrs. Keene helped to the high school band and to the community, Mr. Snow said. Her guidance in inserting in work to the service unit of the club, he said.

Mrs. Keene was also cited for her work in the Bourne Community Chorus and the Bourne Choral Society. She is also active in the Bourne Women's Club and the Bourne Women's Club and the Bourne Women's Club and
